What ?

A cleaner to clean cement surfaces and to clean tool from cement stains and spills.

When and where?

Clean fouled and dirty cement and sand wash surfaces such as parkings, laydown areas, walkways etc. Clean tools and equipment from cement stains and spills

How?

Pour cement cleaner onto surface and distribute evenly with a squeegee or similar, let react and soak for few minutes, wash off with plenty of water. Brush onto or soak equipment with stains and spill, wash off with water.

Why?

- Restore ugly or slippery concrete surfaces
- Restore decorative sand wash areas
- Use where HP washers are not suitable
- Clean fouled equipment
