## What ?

Potassium based hold and ship cleaner for cleaning of holds and general deck cleaning use with fresh or seawater. Slightly foaming

## When and where?

P-wash is water based and can be diluted with water to clean cargo holds, decks, structure etc on ships, rigs, jetties, plants and similar

## How?

Mix 1 part T11 with 10 parts water for general cleaning higher or lower concentration depending on cleaning requirement.

Clean by mopping, spraying, brushing etc. After cleaning rinse off with potable water. Can use with seawater.

Suggested hold cleaning:

- 1) Hose off hold with seawater to remove worst contamination
- 2) Hose off remaining contamination with a mix of T11 as described above
- 3) Final washing with fresh water, ensure adequate drying before new cargo

## Why?

- Water based and safe
- Effective and economical
- Make hold grain clean
- Easy to use
- Dilute on site
